

Application

The general purpose non-intrusive capacitance level switch provides reliable liquid level detection of water based conductive liquids with non-coating and/or scaling characteristics with a 1A relay output. Media examples include hydrochloric, sulfuric acid and water. The liquid level sensor is bracket mounted on the exterior wall of non-metallic tanks and applied as a high level alarm or low level alarm.

Features

- ✓ Non-intrusive level detection through plastic or fiberglass walls
- ✓ Installed with polyethylene, polypropylene or PVDF adhesive 3M mounting brackets
- ✓ Rugged PSO enclosure rated NEMA 4X with conduit connector
- ✓ 60VA relay selectable NO or NC via power supply wiring polarity

Key Benefits

- ✓ Ideal for high purity conductive liquids
- ✓ Three different bracket materials makes attachment to tank easy
- ✓ Great for non-metallic or FRP tanks up to 1" thick
- ✓ Use as a high or low level switch

Tech Tip

With two calibration adjustments, the non-intrusive switch set point will be customized to your specific tank wall thickness and application media.

Switch-Pro™ Remote Level Controller

Application

Available in general purpose classification, the level controller is offered in three configurations for pump and valve control. The LC40 accepts one level sensor input and provides one 10A relay. The LC41 accepts two level sensor inputs and provides one latching 10A relay for automatic fill or empty control. The LC42 accepts three level sensor inputs with one latching 10A relay output for automatic fill or empty control, and a second non-latching 10A relay for high level alarm or low level alarm. For field mount installation, add a single or dual indicator NEMA box.
